UV LAMPS

You must have sight of an original driving licence and then certify that you have checked the licence with an Ultra Violet Lamp. This is to establish the authenticity. A photocopy of the licence (including the photo card) must be certified.

The wording on the copy licence must be:

“I certify that the indemnity/address proofs are first copies of the original seen by myself. I have checked the customer’s signature and checked the original driving licence with an ultra violet lamp”

- and then signed by the person checking the licence.

**IF THE ABOVE IS NOT ON THE DRIVING LICENCE WE
WILL NOT PAYOUT.**
